Research Fellowships in Barcelona

ICFO Young Minds Program

ICFO-The Institute of Photonic Sciences, teaming up with Caixa Catalunya Obra Social, is offering a limited number of fellowships to carry out a challenging research project at ICFO over the summer period. The fellowship program aims at outstanding undergraduate students within the last two years of their Master-equivalent or Engineering degree studies (Engineering, Physics, Chemistry, Mathematics and Biology).

The *ICFO - Caixa Catalunya Summer Fellows* are hosted and coached by the different ICFO research groups. While conducting research, the *ICFO - Caixa Catalunya Summer Fellows* engage in a focused training program covering the basics and applications of the different research topics active at ICFO, achieving a comprehensive overview of frontier research areas in Photonics.

- biophotonics and photo-medicine ■
- optical telecommunication and information technologies ■
- optical sensing and optoelectronics ■
- atto-optics and quantum information ■
- nanophotonics and nanotechnology ■

The application form and further details are available at the Job Openings section at www.icfo.es. Applications should be submitted to icfojobs@icfo.es, including a *Curriculum Vitae* and recent academic transcripts. The deadline for application is March 31, 2009.
